KOUVOLA CARGO HANDLING TERMINAL AREA

10 hectares

An aerial photograph of an industrial site. On the left, there are several large, modern cargo handling terminals with grey roofs. To the right, a long, straight railway line runs parallel to a large, dark, muddy area, possibly a quarry or a large-scale construction site. The background shows a dense forest under a clear sky. A white callout box highlights a specific area of the terminals.

LATEST NEWS ON KOUVOLA-XI'AN TRAINS

- EAST BOUND

- Forest industry's block train deliveries - competitive route via Xi'an to e.g. Chengdu and Zhengzhou areas
- New direct train routes are under negotiation for building, food and mining industry in China

- WEST BOUND

- Regular traffic from Xi'an to Kouvola will be launched still this year
- Xi'an terminal operation has recovered since 2018 traffic jams/delays -> e.g. new block train service for Volvo: 3-5 train departures/week

Thank you.
